2.1 Description of separate sanitary sewer/nominally separate sanitary sewer (up to 750 mm) / forcemain (upto 350 mm).

[illegible]

2.2 Regulatory Requirements

- 1) Is the proposed work(s) exempted from the Environmental Bill of Rights (EBR) requirements?

YES ☐ NO ☐ N/A ☐

If 'YES' provide a rationale for exemption (e.g. provide the applicable regulation details):

- ☐ This proposal is for an emergency situation.
- ☐ This proposal is for an amendment to or revocation of an existing ECA that is not environmentally significant.
- ☐ This proposal has been subject to or exempted from EAA requirements or considered in a decision of a tribunal.
- ☐ This proposal has been considered in a substantially equivalent process of public participation and the public consultation was carried out under the Planning Act requirements.

- 2) Is the proposed work(s) subject to the requirements of the Environmental Assessment Act (EAA)?

YES ☐ NO ☐ N/A ☐

If 'YES', choose the applicable Municipal Class EA Schedule:

Schedule A EXEMPTED	Schedule A+ EXEMPTED	Schedule B <input type="checkbox"/>	Schedule C <input type="checkbox"/>	Not Required <input type="checkbox"/>
-------------------------------	--------------------------------	--	--	--

If 'NO' provide a rationale for exemption:

Has the proposed undertaking fulfilled the requirements of the EAA through an exemption provided under:

Section of Ontario Regulation No.

or

Declaration/Exemption Order No.

Provide supporting documentation to explain why it applies to this facility.

Attachment A - SS1 (Sanitary Sewer, Pre-Construction)

- 3) Has consultation with Indigenous communities been completed?

YES ☐ NO ☐ N/A ☐

If 'NO', please provide the rationale why:

- 4) Has a Notice of Completion been submitted along with this application?

YES ☐ NO ☐ N/A ☐

- 5) Were any Part II Orders (i.e. 'Bump-up' requests) received for this project?

YES ☐ NO ☐ N/A ☐

If 'YES', please provide details:

- 6) Has an Environmental Study Report (ESR) been completed?

YES ☐ NO ☐ N/A ☐

If 'Yes', please include ESR Cover page with this submission.

- 7) Does the Drainage Act apply for this work?

YES ☐ NO ☐ N/A ☐

If YES, please provide a copy of the Approval.

- 8) Does the proposed work require a Permit from the Conservation Authority?

YES ☐ NO ☐ N/A ☐

If 'YES,' include a copy of the Permit.

If 'NO', the CLI-ECA cannot be processed until the Permit is received.

Attachment A - SS1 (Sanitary Sewer, Pre-Construction)

- 9) Are the proposed works a prescribed drinking water threat under the Clean Water Act (i.e., the establishment, operation, or maintenance of a system that collects, stores, transmits, treats, or disposes of sewage / sanitary sewers and related collection systems subcategory)?

YES	<input type="checkbox"/>	NO	<input type="checkbox"/>	N/A	<input type="checkbox"/>
-----	--------------------------	----	--------------------------	-----	--------------------------

- 10) Are proposed works located in an IPZ-1, WHPA-A or WHPA-B vulnerable area with a vulnerability score of 10 defined in the Toronto and Region source protection plan under the Clean Water Act¹?

YES	<input type="checkbox"/>	NO	<input type="checkbox"/>	N/A	<input type="checkbox"/>
-----	--------------------------	----	--------------------------	-----	--------------------------

- 11) Is the conveyance capacity of proposed works over 10,000 cubic metres of sewage per day²?

YES	<input type="checkbox"/>	NO	<input type="checkbox"/>	N/A	<input type="checkbox"/>
-----	--------------------------	----	--------------------------	-----	--------------------------

If YES to 9, 10, and 11, the proposed works are a significant drinking water threat. Please provide details of MECP Source Protection Standard Operating Policies³ to mitigate significant risks:

--

2.3 Technical Submissions

1) Engineering Reports

Name of the Report	Prepared by (Consulting firm)	Date (mm/dd/yyyy)	Stamped (mm/dd/yyyy)

¹ Note – as of March 2025, the City of Markham does not have any IPZ-1, WHPA-A or WHPA-B areas including any with a vulnerability score of 10.

² Threshold for significant threat is per MECP's Threats and Circumstances Table (2017_2018_chemical_and_pathogen_tables_of_threats_12_v2.xlsx - <https://www.ontario.ca/page/tables-drinking-water-threats>)

³ Design Criteria for Sanitary Sewers, Storm Sewers and Force mains for Alterations Authorized under an Environmental Compliance Approval Ministry of Environment, Conservation and Parks v.2.0, May 31, 2023, Appendix II

Attachment A - SS1 (Sanitary Sewer, Pre-Construction)

2) Engineering Drawings

(General Plans, Plans & Profiles, Sanitary Drainage Plans, and Design Sheets)

Name and number of Engineering Drawings	Prepared by (Consulting firm)	Date (mm/dd/yyyy)	Stamped (mm/dd/yyyy)

3.0 Design Certification By Licensed Engineering Practitioner

- 1) I certify that the design complies with the requirements set in the Corporation of the City of Markham's Environmental Compliance Approval (ECA) for the Markham Wastewater Collection system, ECA Number 021-W601, as amended from time to time.
- 2) I certify that the design of the sanitary sewer satisfies the criteria set out in the Ministry's publication titled "Design Criteria for Sanitary Sewers, Storm Sewers and Forcemains" dated May 2023, as amended from time to time.
- 3) I certify that the design is consistent with the current City's Design Criteria and Standard Drawings, as amended from time to time.
- 4) I certify that no gravity sanitary sewers exceed 750 mm in diameter and no forcemain sanitary sewers exceed 350 mm in diameter.
- 5) I also certify that any deviations due to site conditions or constraints, as identified in (1) to (4) above, have been discussed, reviewed, and accepted by the City. I further certify that approval for any works that do not meet the minimum requirements in the CLI ECA will be requested through the Ministry (i.e., Schedule C Notice¹).

1 Any Schedule C submission will require a separate type of checklist, since they do not feed into SW1 forms and do not necessarily meet CLI ECA requirement. The City may have many similar documentation requirements as these preauthorized works but we will have to track and report on those separately.

Attachment A - SS1 (Sanitary Sewer, Pre-Construction)

- 6) I hereby further verify the following:
- a) The maximum wastewater discharge by users who will be serviced by the addition, modification, replacement or extension of the separate sewer/nominally separate sewer/forcemain will not result in:
 - An exceedance of the municipal sewage collection system hydraulic capacity, sewage treatment plant uncommitted reserve hydraulic capacity, or the downstream pumping station capacity;
 - Adverse effects;
 - Any increase in collection system overflows that is not offset by measures, and have documented any offset measures used.
 - Any increase in the frequency and/or volume of Sewage Treatment Plant (STP) bypasses or STP overflows that is not offset by measures, and have documented any offset measures used. (Alternatively, if the wastewater flows to a STP not owned by the Owner, then the wastewater volume or flow rate is as agreed to with the Owner of the STP).
 - b) The separate sewer, nominally separate sewer or forcemain alteration will:
 - Not cause overflows or backups, nor increase surcharging at any maintenance holes or privately owned infrastructure (e.g. basements) within the municipal sewage collection system or any municipal sewage collection system connected to it; and
 - Provide smooth flow transition to existing gravity sewers.
 - c) An assessment of the proposed works has been completed to determine if the works pose a significant drinking water threat. The proposed works (Separate Sewers, Nominally Separate Sewers or Forcemains) are not significant threats to sources of drinking water or the design includes features that mitigate risk, such as those included in the Ministry's Standard Operating Policy for Sewage Works, as amended from time to time; and Source Protection Plan policies pertaining to the works;
 - d) The separate sewer/nominally separate sewer/forcemain alteration is wholly located within the municipal boundary over which the Owner has jurisdiction except where there is an agreement existed between municipalities;
 - e) The Owner consents to the separate sewer/nominally separate sewer/forcemain alteration; and

Attachment A - SS1 (Sanitary Sewer, Pre-Construction)

f) I am an authorized representative of the Owner to complete this verification.

4.0 **Statement of Applicant / Developer**

I hereby declare that, to the best of my knowledge, the information contained herein, and the information submitted in support of this application is complete and accurate for the purpose of obtaining the Sanitary Sewer (SS1) Approval for Future Alteration Authorized for Separate Sewers/Nominally Separate Sewers/Forcemains under **021-W601**.

Name (First and Last name)	Title
Signature	Date (mm/dd/yyyy)

5.0 Documents to be Submitted by the Consulting Engineering

- 1) This Attachment A, duly signed and dated by the Consulting Engineer and the Applicant.
- 2) Proof of legal name (*Articles of Incorporation or other applicable documents if the Applicant is a Corporation; or birth certificate or passport if the Applicant is a person*).
- 3) If applicable, Permit / Approval from the local Conservation Authority and/or MNRF.
- 4) If applicable, a Proof of Consent letter from the landowner is to be provided, if the works are to be constructed on lands not owned by the Applicant.

6.0 Review by the City of Markham Department

The above information (including all Technical Reports and Engineering Drawings) has been reviewed and/or peer-reviewed by the appropriate City's Department and meets the City's requirements. Acceptance of this project is in reliance on the professional skill and judgement of the Licensed Engineering Practitioner certified in Section 3.0.
