

AMD CEO, Dr. Lisa Su Announces World's Best Mobile Processors at the 2021 Consumer Electronics Show

At the annual Consumer Electronics Show, AMD CEO, Dr. Lisa Su announced that the highly-efficient and extremely powerful “Zen 3” core architecture is coming to the laptop market via AMD’s Ryzen™ 5000 Series. AMD Markham – one of AMD’s largest global research and development offices – played a pivotal role in this notable advancement in mobile technology. The cutting edge innovation led by AMD Markham lab continues to contribute to AMD’s global success. More on AMD’s Ryzen™ 5000 Series [here](#).

As one of Markham’s leading technology employers, AMD Markham has contributed to creating critical high quality employment and remains deeply committed to providing corporate support in building a thriving local community. In response to Covid-19, AMD has donated significant resources to combat the pandemic including: the establishment of a COVID-19 HPC fund to provide supercomputer resources to research institution to accelerate medical research on COVID-19 and other infectious diseases, contributions of significant amount of PPEs to health care workers, and cash reliefs to local charities and hospital. As well, AMD’s latest contribution is towards the COVID-19 vaccine research. More on vaccine research [here](#).
