

## **APPENDIX A**

### **Background Data**

## 1.0 Background Information Reviewed

The following **Table 1-1** summarizes the background information reviewed for the preparation of the hydrologic modeling.

**Table 1-1 – Background Data**

Hello Geoff:

Please find attached the Data License Agreement for your review and signature. Please email me a copy after signing the agreement.

Our IT department is finishing up the orthophoto DVD, and the disc should be ready by tomorrow; I will let you know where to pick it up once it becomes available.

The following are the ponds that have already been retrofitted:

- SE Quadrant Brown's Corner (SWMSoft Pond #7)
- Leitchcroft Farm Pond 2 (SWMSoft Pond #25)
- Beaver Creek Pond 3 (SWMSoft Pond #27)
- Bridle Trail Phase 5 (SWMSoft Pond # 40)
- Unionville B-3 Subdivision (SWMSoft Pond #44)

The retrofit study reports for Ponds #25, 40, and 44 are available in SWMSoft, and unfortunately those are only

information I could find regarding the retrofitted ponds. I have been trying to locate the as-constructed drawings but no luck yet. I will follow up with Capital Works and hopefully can get something from their side.

Lastly, please do not forget to send me the Gantt Chart in excel spreadsheet format at your earliest convenience.

Thank you!

Regards,

Cynthia,

The GIS data is ready to burn to CD. I'm waiting for ITS to finish up the Orthophoto DVD.

The Data License Agreement is attached if you want to send it on to Cole.

**Subject:** RE: Markham Ponds EA - Confirmation of Retrofit Ponds

Hi Geoff:

I have no luck in finding the as-built drawings for confirmation of the ponds to see if they have been previously retrofitted. However, as per discussion with senior staff, whenever we have a retrofit report, the proposed retrofit work should have been completed. Based on this assumption, Pond # 1, 2, 3, 30, and 43 are retrofitted. For #38, and #39, the City does not have plan for the retrofit work yet.

How's the report selection at TRCA?

Regards,

Hi Patricia:

I have looked into STEP 1 required information and providing the following clarification:

Pond 17 – It's privately owned. As such, even if the facility is built or not, it's not within the scope of this study.

Pond 42 – It's assumed

Pond at SW corner of Caston Ave and Ian Baron Ave – It's privately owned and is gone now. No SWM Pond.

Hi Geoff:

I have received new information today regarding the mentioned pond and it's a different story that I heard yesterday. Please see attached drawing for your reference. We do not have any associated SWM Report, but seems like it's a detention pond for sediment control that I believe does not meet current SWM standards. Please see if this will change the priority.

**Subject:** FW: Comments on Markham Stormwater Management Facilities Retrofit EA

Hi Cynthia,

In response to the below email:

The first part is really just due to the clutter of sites on the map. We'll clarify the point with the stakeholder but the map is correct.

We'll acknowledge the second point and commit to making the maps consistent.

We don't have any data regarding the pond mentioned in the email. Are you able to confirm what this site is? We believe the pond in question is located at Uncontrolled Outlet 105 on the Priority Sites map. We looked at the site and it appears as though the pond is a marsh area that spills over into an adjacent marsh area. Do you know if this is actually a SWM Pond owned and operated by the City?

**To:** ctam@markham.ca; Markham Pond EA  
**Subject:** Comments on Markham Stormwater Management Facilities Retrofit EA

Cynthia and Geoff.....I attended the PIC on March 5 and spoke to the engineers. I support the objectives of the project, but have questions about the details. To groundtruth the information, I looked at the locations near my house on Normandale Road. I have three questions.

1. Although hard to read, the Study Overview map shows 6 uncontrolled outlets and zero storm water management facilities, yet 7 numbers are shown on this map – 100, 101, 102, 103, 104, 105, 106. Please explain the discrepancy.
2. The map with "Priority Sites Evaluated for Preferred Retrofit" identifies 3 selected uncontrolled outlets in this area – 106, 105, 112. Why is this numbering system different from the earlier map? Isn't this a recipe for

confusion and error?

3. I always assumed that the small pond east of 59(?) Normandale was a storm water pond. Is it?

Following your response to these questions, I may have more points to raise.

Thanks for your response.

Peter Miasek  
34 Normandale Rd.

Hi Geoff:

I finally received information from engineering regarding your query regarding some locations. Please see below my feedback in red.

**Subject:** Pond Retrofit Study

Hi Cynthia,

We're just about complete the screening for the pond locations and uncontrolled outlets. There are a few points that we'd like to clarify with the City in order to determine if a few of these sites should be carried forward for consideration. These are:

1. The industrial/commercial areas at Addiscott Crt and Bodington Court – is the City aware if there on site controls associated with these developments?  
**On-site control for site plan: 80% TSS removal, 100 Year controlled to 2 Year**
2. The development at Glenburn Forest Way appears fairly recent – Is the City aware if any controls (other than ponds) were provided for this development?  
**No SWM Pond nor on-site control. Discharge directly to creek.**
3. Does the City have any information related to the Toogood Pond – What is this ponds function?  
**Toogood Pond is an online pond for recreation purposes. It is not intended for quantity or quality control.**
4. Can drainage area plans be provided for the development at Squire Baker's Lane and Major Buttons Drive?  
**See attached and the separate email (file size too big)**
5. On page 9 of the 1999 Retrofit Study, can any details be provided for the development draining to outlet #6? There is no sewer information provided for this area and it appears to be a private industrial site.  
**See Figure 3 in separate email (file size too big)**

Regards,

**Geoff Masotti, P.Eng.**

## **APPENDIX B**

### **Vegetation Investigations and Classification**

# Vegetation Survey - Initial Desktop Screening of Ponds

October 2012

| Pond ID | Survey Needed (Y/N/Questionable) | Reasoning                                            |
|---------|----------------------------------|------------------------------------------------------|
| 1       | Yes                              | Significant forest patch south of pond               |
| 2       | Questionable                     | Urban Area but appears to be some natural vegetation |
| 3       | Questionable                     | Urban Area but appears to be some natural vegetation |
| 4       | Yes                              | Potential Wetland Habitat                            |
| 5       | No                               | Cultural mowed area                                  |
| 6       | No                               | Cultural park                                        |
| 8       | No                               | Urban Area                                           |
| 9       | No                               | Urban area                                           |
| 11      | No                               | Cultural urban area                                  |
| 12      | No                               | Cultural park                                        |
| 13      | No                               | Urban park                                           |
| 14      | No                               | Cultural park                                        |
| 15      | No                               | Cultural park                                        |
| 16      | Yes                              | Significant Forest Patch east of pond                |
| 17      | No                               | Cultural park                                        |
| 18      | No                               | Parking lot and buildings                            |
| 19      | No                               | Cultural park                                        |
| 20      | No                               | Cultural meadow                                      |
| 21      | No                               | Cultural meadow                                      |
| 23      | No                               | Cultural park                                        |
| 24      | Yes                              | Significant forest patch                             |
| 30      | No                               | Newly constructed SWM ponds                          |
| 31      | No                               | Cultural park                                        |
| 32      | No                               | Cultural park                                        |
| 33      | No                               | Cultural park                                        |
| 34      | No                               | Cultural park                                        |
| 35      | No                               | Cultural park                                        |
| 36      | No                               | neighbourhood park                                   |
| 37      | No                               | Cultural meadow                                      |
| 38      | Yes                              | Significant Forest                                   |
| 39      | Yes                              | River corridor                                       |
| 41      | No                               | Cultural park                                        |
| 42      | Yes                              | Wetland                                              |
| 43      | Questionable                     | Forest cover to NW                                   |
| 45      | Questionable                     | Wetland                                              |
| 46      | No                               | Cultural meadow                                      |
| 47      | Yes                              | Surrounded by forest                                 |
| 48      | Yes                              | Significant forest to south east                     |
| 49      | Yes                              | Significant forest                                   |
| 50      | Yes                              | Significant forest                                   |
| 51      | Yes                              | Significant forest surrounding                       |
| 52      | Yes                              | Potential forest buffer                              |
| 53      | No                               | Cultural park                                        |
| 55      | Yes                              | Forest                                               |
| 56      | Yes                              | Forest                                               |
| 57      | No                               | Cultural park                                        |
| 59      | No                               | Cultural park                                        |

| 10      | questionable                     | natural park setting                                 |
| 14      | questionable                     | been there before                                    |
| 1       | no                               | urban area                                           |
| 2       | no                               | cultural meadow                                      |
| 4       | no                               | cultural park                                        |

Cole Engineering Group Ltd. (Cole Engineering) undertook a vegetation survey during the weeks of October 15 to 19, 2012 and October 22 to 26, 2012. The purpose of this study was to classify the surrounding vegetation communities of the existing stormwater management (SWM) facilities and uncontrolled area outlets.

In phase two of the vegetation survey each site (that was not screened out in phase one) was visited and classified using the Ecological Classification of Southern Ontario (ELC) guidelines (Lee, 1998). As no in-depth soil analysis was taken at each site, the areas are classified to the ELC Community Series. Community series are distinguished based on the type of vegetation cover or the plant form that characterizes the community. The dominant plant species are included as well as a general soil series as found in the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs.

## 1.0 Current Storm Water Management Facilities

### 1.1 SWM Pond 1

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Cashel (Cac). This is a clay based soil that has good drainage has smooth and gently sloping topography with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into four (4) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized, recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a thicket. Thickets have a low canopy tree cover but high understory density. These areas are often dominated by shrubs with a few canopy trees. These areas are also often found in urbanized areas and can contain a high amount of non-native species. Thicket species noted include European Buckthorn, Staghorn Sumac, Red Osier Dogwood, Willow sp., and Green Ash.

The third (3<sup>rd</sup>) vegetation community is woodland. Woodland is categorized as having a canopy tree cover between 35-60% with an understory of graminoids. This is a transitional vegetation category with the area probably transitioning from a cultural meadow to a forested site. The main canopy species in this section are Bur Oak, White Pine, and Green Ash. The understory is mainly cultural grass species but also includes goldenrods and asters, as well as other non-native species.

The fourth (4<sup>th</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

Other notable features included a freshly chewed tree and a Beaver hut located on the west bank. Photos can be found in **Appendix C – Vegetation Photos**.

## 1.2 SWM Pond 2

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Cashel (Cac). This is a clay based soil that has good drainage has smooth and gently sloping topography with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized, recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a thicket. Thickets have a low canopy tree cover but high understory density. These areas are often dominated by shrubs with a few canopy trees. These areas are also often found in urbanized areas and can contain a high amount of non-native species. Thicket species noted include European Buckthorn, Staghorn Sumac, Red Osier Dogwood, Willow sp., and Green Ash.

The third (3<sup>rd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails and Phragmites.

## 1.3 SWM Pond 3

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found to consist of the soil series Peel (Pec) & Malton (Mac). The Peel series is a clay based soil that is imperfectly drained and is smooth and very gently sloping with a stoniness class of stone free. The Malton series is a clay based soil that is poorly drained and is also smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized, recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a thicket. Thickets have a low canopy tree cover but high understory density. These areas are often dominated by shrubs with a few canopy trees. These areas are also often found in urbanized areas and can contain a high amount of non-native species. Thicket species noted include European Buckthorn, Staghorn Sumac, Red Osier Dogwood, Willow sp., and Green Ash.

The third (3<sup>rd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails and Phragmites.

## 1.4 SWM Pond 4

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found to consist of the soil series Peel (Pec) & Malton (Mac). The Peel series is a clay based soil that is imperfectly drained and is smooth and very gently sloping with a stoniness class of stone free. The Malton series is a clay based soil that is poorly drained and is also smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a Marsh community class. Specifically there are multiple smaller marsh community series along the moisture gradient moving away from the pond. These range from shallow marsh (standing water less than 2 metres present for most of the year, cattail and Soft-stemmed bulrush dominated) to meadow marsh (seasonal flooding occurring in the spring but dry to moist by the summer, Phragmites dominated).

The third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

## 1.5 SWM Pond 16

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Milliken (MI). This is a loam based soil that is imperfectly drained has smooth moderately and gently sloping topography with a stoniness class of few stones.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) and largest vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a dominate Crack Willow canopy with an understory of Manitoba Maple, Green Ash, Silver Maple, and Trembling Aspen.

The third (3<sup>rd</sup>) vegetation community is a marsh. These marsh patches are small and localized with a dominate cover of Cattails.

## 1.6 SWM Pond 24

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Peel (Pec). The Peel series is a clay based soil that is imperfectly drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be described as a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Willow and Manitoba Maple canopy with Red Osier Dogwood and European Buckthorn understory. Refer to **Appendix – Vegetation Inspection** for photos.

## 1.7 SWM Pond 38

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a thicket. Thickets have a low canopy tree cover, but high understory density. These areas are often dominated by shrubs with a few canopy trees. These areas are also often found in urbanized areas and can contain a high amount of non-native species. Thicket species noted include European Buckthorn, Red Osier Dogwood, Willow sp., and Green Ash.

The second (2<sup>nd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Sugar Maple canopy with Trembling Aspen and Basswood species.

The third (3<sup>rd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails.

## 1.8 SWM Pond 39

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails with Spotted Joe Pye Weed and Red Osier Dogwood also present.

The second (2<sup>nd</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The third (3<sup>rd</sup>) community is a Coniferous forest. Coniferous forests are described as tree cover greater than 60% with 75% of the canopy being coniferous. White Cedar was the dominant species in this coniferous forest.

## 1.9 SWM Pond 42

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into four (4) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails with Spotted Joe Pye Weed, Red Osier Dogwood, and Beggarticks also present.

The second (2<sup>nd</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The third (3<sup>rd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Trembling Aspen canopy with Weeping Willow and Silver Maple present.

The fourth (4<sup>th</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

### 1.10 SWM Pond 43

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails with a few Willow shrubs present.

The second (2<sup>nd</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

The third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

### 1.11 SWM Pond 45

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Woburn (Wol). The Woburn series is a loam type soil that has good drainage and is smooth and steeply sloping with a stoniness class of a few stones.

The existing vegetation in the area can broadly be broken down into two (2) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails with a few Willow and Red Osier Dogwood shrubs present.

The second (2<sup>nd</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds. This area is a culturally maintained park so it is dominated by mowed grass.

### 1.12 SWM Pond 47

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into two (2) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

An important feature to this pond is the surrounding forest to the north and east of the pond. This is a well established mature deciduous forest that is acting as a buffer to the river system. It is made up of predominantly Sugar Maple trees with Basswood and Green Ash species also present. Care should be taken to preserve this forest as it appears to be connected to a larger patch of undisturbed forest corridor. Refer to **Appendix – Vegetation Inspection** for photos illustrating this area.

### 1.13 SWM Pond 48

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Woburn (Wol). The Woburn series is a loam type soil that has good drainage and is smooth and steeply sloping few stones.

The existing vegetation in the area can broadly be broken down into two (2) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

There were two (2) other notable features observed in the area of pond 48. The first (1<sup>st</sup>) was the presence of a Belted Kingfisher. A Belted Kingfisher is the only Kingfisher that is commonly found in Northern United States and

Canada. It is a stocky, medium sized bird that measures between 28-35cm. Its primary source of food is fish but they also eat amphibians, small crustaceans, insects, small mammals and reptiles. The species is not currently listed as a species at risk but the species is listed as a high-priority candidate wildlife species for consideration by the Committee on the Status of Endangered Wildlife in Canada (COSEWIC) because of the long-term, steepening declines due its specialized nesting habits and piscivorous (primarily fish eating) nature (<http://www.ec.gc.ca/soc-sbc/oiseau-bird-eng.aspx?sY=2011&sL=e&sM=p1&sB=BEKI>).

The second (2<sup>nd</sup>) notable feature was the mature mixed forest that surrounded pond 48. This mixed forest vegetation type is much older and more established than the surrounding area. It was comprised of a Sugar Maple Hardwood forest moving into a White Pine, Hemlock forest. There is little understory or ground cover due to the lack of light penetrating the tree canopy. There are also sub-canopy species such as Ash, Black Cherry, and Ironwood present. Care should be taken to preserve this forest as it contains large old growth White Pine and Hemlock trees and appears to be connected to a larger patch of undisturbed forest corridor. Refer to **Appendix – Vegetation Inspection** for photos illustrating this area.

### 1.14 SWM Pond 49

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Milliken (MI). The Milliken series is a loam type soil that is imperfectly drained and is smooth and moderately to gently sloping with few stones.

The existing vegetation in the area can broadly be broken down into four (4) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is thicket. Thickets have a low canopy tree cover, but high understory density. These areas are often dominated by shrubs with a few canopy trees. These areas are also often found in urbanized areas and can contain a high amount of non-native species. Thicket species noted include European Buckthorn, Red Osier Dogwood, Willow sp., and Staghorn Sumac.

The third (3<sup>rd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails and Phragmites with a few Willow and Red Osier Dogwood shrubs present.

The fourth (4<sup>th</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest appears to be an old plantation that has a mainly Basswood, Black Walnut, and Norway Spruce Canopy.

A notable feature in this pond area was the sighting of 2 deer that were observed in the deciduous forest vegetation community.

### 1.15 SWM Pond 50

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Peel (Pec). The Peel series is a clay based soil that is imperfectly drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails with a few Willow and Red Osier Dogwood shrubs present.

The second (2<sup>nd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest is dominated by American Beech trees with smaller amounts of Hawthorn and Staghorn Sumac.

The third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

### 1.16 SWM Pond 51

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Woburn (Wol). The Woburn series is a loam type soil that has good drainage and is smooth and steeply sloping few stones.

The existing vegetation in the area can broadly be broken down into four (4) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails and Phragmites with a few Willow and Red Osier Dogwood shrubs present.

The third (3<sup>rd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Sugar Maple – Red Oak canopy with American Beech, Green Ash, Basswood, and Ironwood present.

The fourth (4<sup>th</sup>) vegetation community is that of a Cultural Plantation. Cultural Plantations are similar to the Forest classification (greater than 60% tree covered), but are man-made. This plantation was a conifer plantation with a mix of Norway Spruce and White Cedar.

### 1.17 SWM Pond 52

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Milliken (MI). The Milliken series is a loam type soil that is imperfectly drained and is smooth and moderately to gently sloping with few stones.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds. Part of this area is a manicured park and therefore the main species in this area is cultural-mowed grass.

The second (2<sup>nd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Sugar Maple canopy with Black Walnut and European Larch also being present.

The third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

### 1.18 SWM Pond 55

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Woburn (Wol). The Woburn series is a loam type soil that has good drainage and is smooth and steeply sloping few stones.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a dominant Sugar Maple canopy with Ironwood, Manitoba Maple and Red Oak being present in the sub-canopy.

The third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

A notable feature in this pond area was the sighting of an American Mink that appeared multiple times in the larger pond. This suggests that this pond may be an important habitat feature for this individual.

### 1.19 SWM Pond 56

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Milliken (MI). The Milliken series is a loam type soil that is imperfectly drained and is smooth and moderately to gently sloping with few stones.

The existing vegetation in the area can broadly be broken down into four (4) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne’s Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails with a few Willow and Red Osier Dogwood shrubs present at the fringes.

The third (3<sup>rd</sup>) vegetation community is thicket. Thickets have a low canopy tree cover, but high understory density. These areas are often dominated by shrubs with a few canopy trees. These areas are also often found in urbanized areas and can contain a high amount of non-native species. Thicket species noted include European Alder, Red Osier Dogwood, Willow sp., and Staghorn Sumac.

The fourth (4<sup>th</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

A notable feature about this area is its location. It is much less urbanized and is set much further away from development than many of the other ponds and therefore has very little human foot print. It is also part of the larger Rouge River Watershed buffer and therefore care should be taken to preserve this area.

## 1.20 SWM Pond 70

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Woburn (Wol). The Woburn series is a loam type soil that has good drainage and is smooth and steeply sloping few stones.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails and Phragmites with a few Willow and Red Osier Dogwood shrubs present at the fringes.

The third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

## 1.21 SWM Pond 74

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

The second (2<sup>nd</sup>) vegetation community is a mixed forest. Mixed forests have greater than 60% tree cover with deciduous and conifer species each having a canopy cover of greater than 25%. The make-up of this community is Scotts Pine, Green Ash, and Trembling Aspen.

The third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

## 2.0 Uncontrolled Storm Water Management Areas

### 2.1 Uncontrolled Area 163

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Milliken (MI). The Milliken series is a loam type soil that is imperfectly drained and is smooth and moderately to gently sloping with few stones.

The existing vegetation in the area can broadly be classified as a Mixed Forest. Mixed forests have a tree cover that is greater than 60 percent with conifer and deciduous species both making up greater than 25 percent of the canopy. This Mixed forest is Crack Willow & White Cedar, with an understory of American Elm, Sugar Maple and Green Ash.

Refer to **Appendix – Vegetation Inspection** for photos illustrating this vegetation community.

### 2.2 Uncontrolled Area 103

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into three (3) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters,

Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds. Part of this area is a manicured park and therefore the main species in this area is cultural-mowed grass.

The second (2<sup>nd</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Silver Maple, White Ash, and Black Walnut canopy, with American Elm and Manitoba Maple making up the sub-canopy.

As the area currently already has a pond the third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

## 2.3 Uncontrolled Area 134

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Peel (Pec). The Peel series is a clay based soil that is imperfectly drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into two (2) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Bitternut Hickory canopy with Sugar Maple, Basswood, and American Beech also present.

The second (2<sup>nd</sup>) vegetation community can be classified as a Mixed Forest. Mixed forests have a tree cover that is greater than 60 percent with conifer and deciduous species both making up greater than 25 percent of the canopy. This Mixed forest is comprised of White Cedar and Yellow Birch. This is a more lowland lying area that occurs as you approach the stream.

There were two (2) other notable features observed in the area of pond 48. The first (1<sup>st</sup>) was the presence of an American Mink. The Mink was seen exiting the stream and running into the surrounding woods. This suggests that the stream and the surrounding area may be an important habitat feature for this individual.

The second notable feature observed was the presence of Bitternut Hickory trees at the site and how mature the forest appeared. Bitternut Hickory is a Carolinian Species that is more commonly found further south in Ontario. For an urbanized area, it was a well established forest community with little to no invasive species present. This type of habitat is rare in urbanized area therefore care should be taken to preserve this area.

## 2.4 Uncontrolled Area 106

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into two (2) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Willow canopy with Trembling Aspen and Manitoba Maple also present.

The second (2<sup>nd</sup>) vegetation community is a coniferous forest. Coniferous forests have tree cover greater than 60% with coniferous species having a 75% and greater canopy cover. This deciduous forest has a dominant White Cedar Canopy.

Notable features in this area included the discovery of two (2) Butternut Trees. Butternut is listed as an endangered species and therefore is protected under section 9 of the *Endangered Species Act 2007* (ESA). Section 9 includes prohibitions against activities such as killing, harming, taking, possessing, buying and selling a species listed as extirpated, endangered or threatened. Butternut prefers moist well-drained soils and is often found along streams growing alone or in small groups. Keeping this factor in mind, it is possible there could be other Butternut trees growing in this buffer area.

## 2.5 Uncontrolled Area 176

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be described as a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

## 2.6 Uncontrolled Area 112

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be described as a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

## 2.7 Uncontrolled Area 159

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be described as a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails with a few Willow and Red Osier Dogwood shrubs present at the fringes. The area was also surrounded by a small Cultural Meadow.

Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

## 2.8 Uncontrolled Area 55

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be described as a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

## 2.9 Uncontrolled Area 162

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be described as a cultural meadow. Cultural Meadow is a cultural (non natural) type of habitat that is often found in urbanized recently disturbed areas. It is made up of predominantly non-native species, which can either be mowed or left to grow naturally. This type of vegetation includes Goldenrods, Asters, Teasel, Queen Anne's Lace, Milkweed and many other species that are often described as weeds.

Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

## 2.10 Uncontrolled Area 105

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be broken down into two (2) categories. Refer to **Appendix – Vegetation Inspection** for photos illustrating the various vegetation categories within the study area.

The first (1<sup>st</sup>) vegetation community is a deciduous forest. Deciduous forests have tree cover greater than 60% with deciduous species having a 75% and greater canopy cover. This deciduous forest has a Green Ash and Crack Willow canopy.

The third (2<sup>nd</sup>) vegetation community is a Shallow Marsh community. Shallow Marshes have standing water less than 2 metres present for most of the year. The marsh was dominated by Cattails.

As the area currently already has a pond the third (3<sup>rd</sup>) vegetation community is open water. This area is categorized as having no vegetation with water greater than 2 metres in depth.

## 2.11 Uncontrolled Area 67

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be classified as a Mixed Forest. Mixed forests have a tree cover that is greater than 60 percent with conifer and deciduous species both making up greater than 25 percent of the canopy. This Mixed forest is Sugar Maple with Norway Spruce and White Pine.

Refer to **Appendix – Vegetation Inspection** for photos illustrating this vegetation community.

## 2.12 Uncontrolled Area 8

The general soil conditions of the area were determined through the use of the Soils of York Region Report published by the Ontario Ministry of Food and Rural Affairs. The study area was found consist of the soil series Bottom Land (B.L.). The Bottom Land series is a variable type of alluvial soil that is variably drained and is smooth and very gently sloping with a stoniness class of stone free.

The existing vegetation in the area can broadly be classified as a deciduous forest. Deciduous forests have a tree cover that is greater than 60 percent with deciduous species making up greater than 75 percent of the canopy. This forest has a canopy of Manitoba Maple and Willow species.

Refer to **Appendix – Vegetation Inspection** for photos illustrating this vegetation community.

Under construction. Building bridge to widen Hwy 7.

## Field Inspection Form – Uncontrolled Areas

Uncontrolled Outlet ID # 8  
General location / Major Intersection Rodick Rd & Hwy 7.  
Date Nov. 21, 2012  
Inspection Completed By Melody Giles & Patricia Osika

### LAND CONDITIONS

#### Existing Land Use:

Residential ☐ Commercial ☐ Industrial ☐ Parkland/Open Space ☒

Mix = (describe) \_\_\_\_\_

woodlot behind house

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: widening of Hwy 7 &  
Hwy 7 bridge adjacent to site.

Notes about the grading of the site (draw a sketch of site and label direction of slope

and slope steepness): relatively flat area w/ steep slopes on  
west side leading up to houses & streets

Visible utilities that conflict with proposed pond location: \_\_\_\_\_

overhead hydro lines along Hwy 7.  
wideared

Other visible physical conflicts and natural hazards that conflict with proposed pond location: \_\_\_\_\_

Access path available for construction equipment (describe and shown on sketch):

only access would be from Hwy 7 - slope down from th  
7 is somewhat steep (still under construction).

Access obstacles, if any: \_\_\_\_\_

To access from \_\_\_\_\_ would have to cross  
channel b/c bounded on W. by ~~steep~~ very steep slopes

Other notes: \_\_\_\_\_

### STORM SEWER OUTLET

Description of outlet structures and shapes: wing wall w/ concrete blocks

Description of outlet materials: cement

Size of outlet pipe: 80 cm  $\phi$  (grate 110 cm wide)

Size / dimensions of other outlet structures: \_\_\_\_\_

Other descriptions: gobbling basket at <sup>base of</sup> outlet have failed  
It got washed away & there is significant erosion / undercutting

### SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

Residential ☐

Commercial ☐

Industrial ☐

Parkland/Open Space ☒

Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: path through park,  
steep slope leading to houses.

Notes about the grading of the site (draw a sketch of site and label direction of slope and slope steepness): small area that is flat.

Visible utilities that conflict with proposed pond location: none.

Other visible physical conflicts and natural hazards that conflict with proposed pond location: \_\_\_\_\_

Access path available for construction equipment (describe and shown on sketch):

Access from Henderson Ave, follow gravel park  
path to site.

Access obstacles, if any: Forest Park Cross @ the intersection of

Other notes: \_\_\_\_\_

Heritage Conservation Neighborhood.

### STORM SEWER OUTLET

Description of outlet structures and shapes: CSP sticking out of side of

Description of outlet materials: CSP / watercourse bank surrounds  
at same or near stone & top

Size of outlet pipe: 75 cm  $\phi$

Size / dimensions of other outlet structures: \_\_\_\_\_

Other descriptions: \_\_\_\_\_

### SKETCH OF SUBJECT AREA

### LAND CONDITIONS

#### Existing Land Use:

Residential ☐ Commercial ☐ Industrial ☐ Parkland/Open Space ☒  
Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: recreation facilities  
in park (double tennis court & childrens playgrounds).

Notes about the grading of the site (draw a sketch of site and label direction of slope and slope steepness): area is relatively flat everywhere

Visible utilities that conflict with proposed pond location: buried electrical  
for tennis court lights.  
Overhead hydro crosses water course DS of outlet.

Other visible physical conflicts and natural hazards that conflict with proposed pond location: \_\_\_\_\_

Access path available for construction equipment (describe and shown on sketch):

Access A of Sciberras Rd (wide opening)  
and potentially from Fred Varty Dr (paved pedestrian path thru houses)

Access obstacles, if any: \_\_\_\_\_

Other notes: Park area used by children (has playgrounds).

## STORM SEWER OUTLET

Description of outlet structures and shapes: wing wall w/ circular opening & grate  
(no chute block)

Description of outlet materials: cement w/ metal grate

Size of outlet pipe: 90 cm  $\phi$  (grade 105cm wide)

Size / dimensions of other outlet structures: U/S channel culvert/outlet  
diameter  $\approx$  180cm CSP w/ armystone surrounding it

Other descriptions: \_\_\_\_\_  
\_\_\_\_\_

## SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

### LAND CONDITIONS

Existing Land Use:

Residential ☐

Commercial ☐

Industrial ☐

Parkland/Open Space ☒

Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: nearby municipal public buildings (Library & community centre). Public trails through wooded area.

Notes about the grading of the site (draw a sketch of site and label direction of slope and slope steepness): Slope gradual valley area <sup>from roads</sup> behind buildings - steeper slope

Visible utilities that conflict with proposed pond location: None overhead.

Fire hydrant. Possibly SAN sewer line. Light posts in park that would have buried cables.

Other visible physical conflicts and natural hazards that conflict with proposed pond location: none

Access path available for construction equipment (describe and shown on sketch):

off of Main St. Unionville.

Access obstacles, if any: \_\_\_\_\_

Other notes: slope behind buildings could be pulled back closer to community centre to make space.

• Could build a pond connected to existing pond & install another pedestrian bridge to maintain pathway.

## STORM SEWER OUTLET

Description of outlet structures and shapes: rectangular outlet in wing wall of large chute blocks

Description of outlet materials: cement.

Size of outlet pipe: 80 cm tall x 2m wide.

Size / dimensions of other outlet structures: adjacent cement pipe (dry) 30cm diameter.

Other descriptions: \_\_\_\_\_

## SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

### LAND CONDITIONS

Existing Land Use:

Residential ☐

Commercial ☐

Industrial ☐

Parkland/Open Space ☒

Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: small area btwn back of houses & creek. Has multiple paved park paths further reducing area.

Notes about the grading of the site (draw a sketch of site and label direction of slope

and slope steepness): uneven subject area but not ~~too~~ big change in elevation  
Moderate slope down to subject area from street.

Visible utilities that conflict with proposed pond location: \_\_\_\_\_

none

Other visible physical conflicts and natural hazards that conflict with proposed

pond location: Floodplain. Winding channel & winding park path.

Access path available for construction equipment (describe and shown on sketch):

along paved park path or directly down the slope  
front Goodhills Cr.

Access obstacles, if any: \_\_\_\_\_

Other notes: Not much space. A pond would likely not fit.  
Number of older / larger trees present.

## STORM SEWER OUTLET

Description of outlet structures and shapes: circular outlet in wing wall w/ check blocks

Description of outlet materials: cement.

Size of outlet pipe: ~ 110 cm Ø

Size / dimensions of other outlet structures: \_\_\_\_\_

wing wall has ~ 160 cm long back face (side of outlet)

Other descriptions: \_\_\_\_\_

## SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

Uncontrolled Outlet ID # 112

General Location / Major Intersection

Date Nov 15, 2012

Inspection Completed By

16<sup>th</sup> Ave & Valley Village Pkwy  
Melody Giles

### LAND CONDITIONS

Existing Land Use:

Residential ☐

Commercial ☐

Industrial ☐

Parkland/Open Space ☒

Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available:

narrow space btwn creek & backs of houses. Paved park path runs along back of houses.

Notes about the grading of the site (draw a sketch of site and label direction of slope

and slope steepness):

prop. pond areas generally flat. Steep slopes down to subject area from nearby roads.

Visible utilities that conflict with proposed pond location:

No overhead utilities in pond area but hydro lines run along 16<sup>th</sup> Ave which would be an access consideration.

Other visible physical conflicts and natural hazards that conflict with proposed

pond location:

paved path could be realigned to make more space.

Access path available for construction equipment (describe and shown on sketch):

Access from 16<sup>th</sup> Ave - slope is steep

Access obstacles, if any:

Other option is along paved park path @ SE corner of Village Pkwy & Rae Cres. somewhat steep slope leading down from 16<sup>th</sup>. Overhead hydro along 16<sup>th</sup> Ave.

Other notes:

but then cut some trees for access along more shallow slope & cross park path again to access subject area.

## STORM SEWER OUTLET

Description of outlet structures and shapes: circular outlet in <sup>the</sup> side of a box culvert.

Description of outlet materials: cement box culvert w/ outlet opening

Size of outlet pipe: ~ 60 cm Ø

Size / dimensions of other outlet structures: none

Other descriptions: MH located near bridge/culvert, in the side slope

## SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

Date Nov 14, 2012

a McCowan

Inspection Completed By Melody Giles

### LAND CONDITIONS

#### Existing Land Use:

Residential ☐ Commercial ☐ Industrial ☐ Parkland/Open Space ☒

Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: secondary channels  
in places adjacent to main channel.

Notes about the grading of the site (draw a sketch of site and label direction of slope and slope steepness): relatively flat area. Gradual slope down to area from roads.

Visible utilities that conflict with proposed pond location: no visible overhead utilities & no signs for buried utilities observed.

Other visible physical conflicts and natural hazards that conflict with proposed pond location: none. Floodplain.

Access path available for construction equipment (describe and shown on sketch):

Access to outlet from Brookbanks Crt. to ~~the~~ Sloped down to creek rather gradually.

Access obstacles, if any: \_\_\_\_\_

Other notes: \_\_\_\_\_

## STORM SEWER OUTLET

Description of outlet structures and shapes: Circular outlet in wing wall <sup>skandalone</sup> <sup>w/ gate</sup>

Description of outlet materials: Cement wing wall & pipe outlet. Chain

Size of outlet pipe: ~1.05m  $\phi$  <sup>link fence on top of wing wall.</sup>

Size / dimensions of other outlet structures: none

Another outlet is located under Raymerville Dr bridge. Bridge is ~130cm high so outlet ~1m  $\phi$  or less. Cement culvert w/ outlet on its side. Staff gauge & possibly water quality monitoring occurring at bridge. <sup>Automated</sup> <sup>the</sup> <sup>a metal gate over it.</sup>

## SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

## Field Inspection Form – Uncontrolled Areas

Uncontrolled Outlet ID #: 159

General location: Major Intersection McLennan & Hwy 7, Outlet at McLennan bridge

Date Nov. 14, 2012

Inspection Completed By: Melody Giles

### LAND CONDITIONS

Existing Land Use:

Residential ☐ Commercial ☐ Industrial ☐ Parkland/Open Space ☒

Mix = (describe) \_\_\_\_\_

Milline  
Dam  
Conserva  
Area  
Park

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: open space is  
conservation lands.

Notes about the grading of the site (draw a sketch of site and label direction of slope

and slope steepness): Generally flat, reedy & tall grasses of river floodpl  
Outlet may be lower than floodplain lands bc outlet partially  
submerged in river.

Visible utilities that conflict with proposed pond location: No overhead utilities  
in subject area. Buried cables along McLennan for street lights  
Buried natural gas pipeline ~ 10m from outlet.

Other visible physical conflicts and natural hazards that conflict with proposed

pond location: Access to floodplain area is easy off at  
Conservation Area driveway/road.

Access path available for construction equipment (describe and shown on sketch): \_\_\_\_\_

Access obstacles, if any: soft ground

Other notes: \_\_\_\_\_

## STORM SEWER OUTLET

Description of outlet structures and shapes: circular cement outlet in headwall

Description of outlet materials: cement headwall w/ opening & metal grate

Size of outlet pipe: ~98 cm Ø

Size / dimensions of other outlet structures: Similar outlet on S. bank, directly opposite of this outlet. (half the size of subject outlet).

Other descriptions: Outlet on N. bank of river adjacent to McLaren Rd bridge.

## SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

### LAND CONDITIONS

Existing Land Use:

Residential ☐

Commercial ☐

Industrial ☐

Parkland ☐ Open Space ☒

Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: \_\_\_\_\_

large flat area  
bounded by steep slopes (w/ Rd or houses at top)  
and by watercourse.

Notes about the grading of the site (draw a sketch of site and label direction of slope

and slope steepness): large flat area. Medium steep slope from  
James Walker Cr. to outlet.

Visible utilities that conflict with proposed pond location: none

Other visible physical conflicts and natural hazards that conflict with proposed pond location: \_\_\_\_\_

Access path available for construction equipment (describe and shown on sketch):

Along Mill St (off of Main St Markham S)  
or vegetated strip of land off of James Walker Cr.

Access obstacles, if any: \_\_\_\_\_

Buffer of large trees on slope from Rd to outlet/flat area  
Overhead cables across Mill St.

Other notes: \_\_\_\_\_

## STORM SEWER OUTLET

Description of outlet structures and shapes: Flat headwall w/ circular hole.

Description of outlet materials: Cement w/ metal grate & rip rap flow path

Size of outlet pipe: 47 in  $\phi$  inner.

Size / dimensions of other outlet structures: 2x15 m wide headwall

Other descriptions: \_\_\_\_\_

## SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

### LAND CONDITIONS

Existing Land Use:

Residential ☐

Commercial ☐

Industrial ☐

Parkland/Open Space ☒

Mix ☐ (describe) \_\_\_\_\_

Rouge Valley Park

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: Rouge Valley Park.

Outlet at base of cliff. Connecting Mt at top of cliff.

Notes about the grading of the site (draw a sketch of site and label direction of slope and slope steepness): \_\_\_\_\_

Visible utilities that conflict with proposed pond location: \_\_\_\_\_

none

Other visible physical conflicts and natural hazards that conflict with proposed pond location: extremely steep & tall cliff blun easiest access

(Colonel Butler Dr) & outlet. Outlet is in a deep valley.

No clear access path from Tuelor Lane either, and in this case we

Access path available for construction equipment (describe and shown on sketch):

have to travel a long distance through forest

Access obstacles, if any: \_\_\_\_\_

Other notes: \_\_\_\_\_

### STORM SEWER OUTLET

Description of outlet structures and shapes: large wing wall w/ chute blocks

Description of outlet materials: cement

Size of outlet pipe: unknown

Size / dimensions of other outlet structures: \_\_\_\_\_

estimate width of wing wall back is ~ 5m

Other descriptions: \_\_\_\_\_

### SKETCH OF SUBJECT AREA

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

## Field Inspection Form – Uncontrolled Areas

Uncontrolled Outlet ID # 176  
General location / Major Intersection Green Lane & Alex's  
Date Nov 14/12  
Inspection Completed By Leticia & Melody

### LAND CONDITIONS

#### Existing Land Use:

Residential ☐ Commercial ☐ Industrial ☐ Parkland/Open Space ☒  
Mix ☐ (describe) \_\_\_\_\_

Amount of space available to construct a stormwater management facility: \_\_\_\_\_

Factors that may limit the amount of space available: Creeks, private lots  
w/ steep slope.

Notes about the grading of the site (draw a sketch of site and label direction of slope and slope steepness): \_\_\_\_\_

Visible utilities that conflict with proposed pond location: \_\_\_\_\_  
none

Other visible physical conflicts and natural hazards that conflict with proposed pond location: steep slopes by private property

= creeks  
- floodplain likely - what return period?

Access path available for construction equipment (describe and shown on sketch):

from green lane, slope is likely flat enough as is but could  
make an access rd. likely.

Access obstacles, if any: \_\_\_\_\_  
no access from Richview Ct.

Other notes: possibility to pipe d/s into open  
space if space right @ outlet is  
too limited Not an option b/c  
that open space is @ a higher  
elevation than valley  
→ retaining wall instead of slopes @ property line?

### **STORM SEWER OUTLET**

Description of outlet structures and shapes: outlet in wingwall of bridge

Description of outlet materials: concrete

Size of outlet pipe: 1.2m $\phi$

Size / dimensions of other outlet structures: \_\_\_\_\_

double ~~or~~ culvert under green lane

Other descriptions: \_\_\_\_\_

### **SKETCH OF SUBJECT AREA**

Label site grading (including slope steepness), potential construction equipment access paths, observed utilities, observed natural hazards and other physical obstacles, outlet location, north arrow.

## **APPENDIX D**

### **Screening Process Details and Rational**

Is the pond a municipally owned / assumed pond?

| PondID | Facility Name                                            | Facility Status | Removed from Consideration? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                                  | Unknown                             |                                                                                                                                         |
|--------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|--------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old<sup>†</sup></b> that are:                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old*</b> that are:                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                                  | Unknown                             |                                                                                                                                         |
|--------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|--------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |

Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> that are:                                                                                                                                                                                 |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old<sup>†</sup></b> that are:                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Pond 37

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> † that are:                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Bond 39.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Pond 4A

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](#)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](#)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](#)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                                  | Unknown                             |                                                                                                                                         |
|--------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <b>YES</b>                          | <b>NO</b>                           | <b>Unknown</b>                      | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old*</b> that are:                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old<sup>†</sup></b> that are:                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                                  | Unknown                             |                                                                                                                                         |
|--------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|--------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means, contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                                 | NO                                  | Unknown                             |                                                                                                                                         |
|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <b>YES</b>                          | <b>NO</b>                           | <b>Unknown</b>                      | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Pond 52

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](#)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](#)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](#)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old†</b> that are:                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                          |                          | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old†</b> that are:                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
|                          |                          |                          | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list (e.g. Ontario Heritage Bridge List)? |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                                  | Unknown                             |                                                                                                                                         |
|--------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|--------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old†</b> that are:                                                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <b>YES</b>               | <b>NO</b>                           | <b>Unknown</b>                      | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Pond 73

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** - Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** - Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** - A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** - The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the *Ontario Heritage Act*.

**Step 3 – Screening for Potential Impacts**

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means, contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>f</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Page 77

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

<sup>†</sup> The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the *Ontario Heritage Act*.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                                  | Unknown                             |                                                                                                                                         |
|--------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|--------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                                 | NO                                  | Unknown                             |                                                                                                                                         |
|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <b>YES</b>                          | <b>NO</b>                           | <b>Unknown</b>                      | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Uncontrolled Outlet 55

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** - Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** - Contact the OHT directly regarding assessment properties. A list of OHT pinquas can be found on the website: [Ontario Heritage Trust](#)

**Parks Canada** - A list of National Historic Sites can be found on the website: [Parks Canada](#)

**Ministry of Tourism and Culture** - The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](#)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

<sup>†</sup> The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                          |                          | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
|                          |                          |                          | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                                  | Unknown                             |                                                                                                                                         |
|--------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|--------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> that are:                                                                                                                                                                                 |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                          |                          | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
|                          |                          |                          | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                                 | NO                                  | Unknown                             |                                                                                                                                         |
|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <b>YES</b>                          | <b>NO</b>                           | <b>Unknown</b>                      | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Uncontrolled OCHET 103

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](#)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](#)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](#)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                                 | NO                                  | Unknown                             |                                                                                                                                         |
|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <b>YES</b>                          | <b>NO</b>                           | <b>Unknown</b>                      | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |

| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Uncontrolled Copy 105

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** -- Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** -- Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** -- A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** -- The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

<sup>†</sup> The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                                 | NO                                  | Unknown                             |                                                                                                                                         |
|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <b>YES</b>                          | <b>NO</b>                           | <b>Unknown</b>                      | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |

| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Uncontrolled Copy 106

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding assessment properties. A list of OHT plaques can be found on the website: [OntarioHeritageTrust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.com)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [OntarioHeritagePropertiesDatabase](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Uncontrolled Outlet 11a

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1.

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [OntarioHeritageTrust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [ParksCanada](http://ParksCanada.com)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [OntarioHeritagePropertiesDatabase](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

<sup>†</sup> The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                                 | NO                                  | Unknown                             |                                                                                                                                         |
|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such property?                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |

| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

Uncontrolled Outlet 162

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                                 | NO                                  | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|-------------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                                 | NO                                  | Unknown                             |                                                                                                                                         |
|-------------------------------------|-------------------------------------|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such property?                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                                 | NO                                  | Unknown                             |                                                                                                                                                                                                                                                                                                                |
|-------------------------------------|-------------------------------------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                     |                                     |                                     | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
|                                     |                                     |                                     | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

**Note:**

If the answer is "yes" to any question in Step 1, proceed to Step 3.

The following resources can assist in answering questions in Step 1:

**Municipal Clerk or Planning Department** – Information on properties designated under the Ontario Heritage Act (individual properties or Heritage Conservation Districts) and properties listed on a Municipal Heritage register.

**Ontario Heritage Trust** – Contact the OHT directly regarding easement properties. A list of OHT plaques can be found on the website: [Ontario Heritage Trust](http://OntarioHeritageTrust.com)

**Parks Canada** – A list of National Historic Sites can be found on the website: [Parks Canada](http://ParksCanada.gc.ca)

**Ministry of Tourism and Culture** – The Ontario Heritage Properties Database includes close to 8000 identified heritage properties. Note while this database is a valuable resource, it has not been updated since 2005, and therefore is not comprehensive or exhaustive. [Ontario Heritage Properties Database](http://OntarioHeritagePropertiesDatabase.com)

**Local or Provincial archives**

**Local heritage organizations**, such as the municipal heritage committee, historical society, local branch of the Architectural Conservancy of Ontario, etc.

Consideration should also be given to obtaining oral evidence of CHRs. For example, in many Aboriginal communities, an important means of maintaining knowledge of cultural heritage resources is through oral tradition.

If the answer is "yes" to any question in Step 2, an evaluation of cultural heritage value is required. If cultural heritage resources are identified, proceed to Step 3.

If the answer to any question in Step 1 or to questions 2-4, 6-8 in Step 2, is "unknown", further research is required.

If the answer is "yes" to any of the questions in Step 3, a heritage impact assessment is required.

If uncertainty exists at any point, the services of a qualified person should be retained to assist in completing this checklist. All cultural heritage evaluation reports and heritage impact assessment reports must be prepared by a qualified person. Qualified persons means individuals (professional engineers, architects, archaeologists, etc.) having relevant, recent experience in the identification and conservation of cultural heritage resources. Appropriate evaluation involves gathering and recording information about the property sufficient to understand and substantiate its heritage value; determining cultural heritage value or interest based on the advice of qualified persons and with appropriate community input. If the property meets the criteria in Ontario Regulation 9/06 under the Ontario Heritage Act, it is a cultural heritage resource.

† The 40 year old threshold is an indicator of potential when conducting a preliminary survey for identification of cultural heritage resources. While the presence of a built feature that is 40 or more years old does not automatically signify cultural heritage value, it does make it more likely that the property could have cultural heritage value or interest. Similarly, if all the built features on a property are less than 40 years old, this does not automatically mean the property has no cultural heritage value. Note that age is not a criterion for designation under the Ontario Heritage Act.

### Step 3 – Screening for Potential Impacts

| YES                      | NO                       | Will the proposed undertaking/project involve or result in any of the following potential impacts to the subject property or an adjacent* property?                             |
|--------------------------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <b>Destruction, removal or relocation</b> of any, or part of any, heritage attribute or feature.                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <b>Alteration</b> (which means a change in any manner and includes restoration, renovation, repair or disturbance).                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <b>Shadows</b> created that alter the appearance of a heritage attribute or change the exposure or visibility of a natural feature or plantings, such as a garden.              |
| <input type="checkbox"/> | <input type="checkbox"/> | <b>Isolation</b> of a heritage attribute from its surrounding environment, context or a significant relationship.                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <b>Direct or indirect obstruction</b> of significant views or vistas from, within, or to a built or natural heritage feature.                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <b>A change in land use</b> such as rezoning a battlefield from open space to residential use, allowing new development or site alteration to fill in the formerly open spaces. |
| <input type="checkbox"/> | <input type="checkbox"/> | <b>Soil disturbance</b> such as a change in grade, or an alteration of the drainage pattern, or excavation, etc.                                                                |

\* For the purposes of evaluating potential impacts of development and site alteration "adjacent" means: contiguous properties as well as properties that are separated from a heritage property by narrow strip of land used as a public or private road, highway, street, lane, trail, right-of-way, walkway, green space, park, and/or easement or as otherwise defined in the municipal official plan.

## Screening for Impacts to Built Heritage and Cultural Heritage Landscapes

This checklist is intended to help proponents determine whether their project could affect known or potential cultural heritage resources. The completed checklist should be returned to the appropriate Heritage Planner or Heritage Advisor at the Ministry of Tourism and Culture.

### Step 1 – Screening for Recognized Cultural Heritage Value

| YES                      | NO                       | Unknown                  |                                                                                                                                         |
|--------------------------|--------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Is the subject property designated or adjacent* to a property designated under the <i>Ontario Heritage Act</i> ?                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property listed on the municipal heritage register or a provincial register/list? (e.g. Ontario Heritage Bridge List) |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property within or adjacent to a Heritage Conservation District?                                                      |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. Does the subject property have an Ontario Heritage Trust easement or is it adjacent to such a property?                              |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Is there a provincial or federal plaque on or near the subject property?                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property a National Historic Site?                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property recognized or valued by an Aboriginal community?                                                             |

### Step 2 – Screening Potential Resources

| YES                      | NO                       | Unknown                  |                                                                                                                                                                                                                                                                                                                |
|--------------------------|--------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                          |                          | <b>Built heritage resources</b>                                                                                                                                                                                                                                                                                |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 1. Does the subject property or an adjacent property contain any buildings or structures <b>over forty years old</b> <sup>†</sup> that are:                                                                                                                                                                    |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Residential structures (e.g. house, apartment building, shanty or trap line shelter)                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Farm buildings (e.g. barns, outbuildings, silos, windmills)                                                                                                                                                                                                                                                  |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Industrial, commercial or institutional buildings (e.g. a factory, school, etc.)                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Engineering works (e.g. bridges, water or communications towers, roads, water/sewer systems, dams, earthworks, etc.)                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Monuments or Landmark Features (e.g. cairns, statues, obelisks, fountains, reflecting pools, retaining walls, boundary or claim markers, etc.)                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 2. Is the subject property or an adjacent property associated with a known architect or builder?                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 3. Is the subject property or an adjacent property associated with a person or event of historic interest?                                                                                                                                                                                                     |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 4. When the municipal heritage planner was contacted regarding potential cultural heritage value of the subject property, did they express interest or concern?                                                                                                                                                |
|                          |                          |                          | <b>Cultural heritage landscapes</b>                                                                                                                                                                                                                                                                            |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 5. Does the subject property contain landscape features such as:                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Burial sites and/or cemeteries                                                                                                                                                                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Parks or gardens                                                                                                                                                                                                                                                                                             |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Quarries, mining, industrial or farming operations                                                                                                                                                                                                                                                           |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Canals                                                                                                                                                                                                                                                                                                       |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Prominent natural features that could have special value to people (such as waterfalls, rocky outcrops, large specimen trees, caves, etc.)                                                                                                                                                                   |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | ▪ Evidence of other human-made alterations to the natural landscape (such as trails, boundary or way-finding markers, mounds, earthworks, cultivation, non-native species, etc.)                                                                                                                               |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 6. Is the subject property within a Canadian Heritage River watershed?                                                                                                                                                                                                                                         |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 7. Is the subject property near the Rideau Canal Corridor UNESCO World Heritage Site?                                                                                                                                                                                                                          |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | 8. Is there any evidence from documentary sources (e.g., local histories, a local recognition program, research studies, previous heritage impact assessment reports, etc.) or local knowledge or Aboriginal oral history, associating the subject property/ area with historic events, activities or persons? |

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

|                                                                                                                         |

| Cultural Features                                                                                                                                                          | Yes                                 | Unknown                             | No                                  |
| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

**Scoring the results:**

|                                                                   |                                                                    |
|-------------------------------------------------------------------|--------------------------------------------------------------------|
| If <b>Yes</b> to <b>any</b> of <b>1, 2a, 2b, 2c, 6, 10, or 11</b> | → high archaeological potential – assessment is required           |
| If <b>Yes</b> to <b>two or more</b> of <b>3, 4, 5, 7, 8, or 9</b> | → high archaeological potential – assessment is required           |
| If <b>Yes</b> to <b>12</b> or <b>No</b> to all of <b>1 - 10</b>   | → <b>low</b> archaeological potential – assessment is not required |
| If 3 or more <b>Unknown</b>                                       | → an archaeological assessment is required (see note below)        |

<sup>†</sup> **Note:** If information requested in this checklist is unknown, a consultant archaeologist licensed under the *Ontario Heritage Act* should be retained to carry out at least a Stage 1 archaeological assessment to further explore the archaeological potential of the property and to prepare a report on the results of that assessment. The Ministry of Tourism and Culture reviews all such reports prepared by consultant archaeologists against the ministry's Standards and Guidelines for Consultant Archaeologists. Once the ministry is satisfied that, based on the available information, the report has been prepared in accordance with those guidelines, the ministry issues an acceptance letter to the consultant archaeologist and places the report into its registry where it is available for public inspection.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| c) Past water source (beach ridge, river bed, relic creek, ancient shoreline, etc.)                                                                                        | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |
| 3. Topographical features on property<br>(knolls, drumlins, eskers, or plateaus)                                                                                           | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 4. Pockets of sandy soil (50 m <sup>2</sup> or larger) in a clay or rocky area on property                                                                                 | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 5. Distinctive land formations on property<br>(mounds, caverns, waterfalls, peninsulas, etc.)                                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| Cultural Features                                                                                                                                                          | Yes                                 | Unknown                             | No                                  |
| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 3. Topographical features on property<br>(knolls, drumlins, eskers, or plateaus)                                                                                           | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 4. Pockets of sandy soil (50 m <sup>2</sup> or larger) in a clay or rocky area on property                                                                                 | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |
| 5. Distinctive land formations on property<br>(mounds, caverns, waterfalls, peninsulas, etc.)                                                                              | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| Cultural Features                                                                                                                                                          | Yes                                 | Unknown                             | No                                  |
| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            | <input type="checkbox"/>            |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.

| Cultural Features                                                                                                                                                          | Yes                                 | Unknown                             | No                                  |
| 6. Known burial site or cemetery on or adjacent to the property<br>(cemetery is registered with the Cemeteries Regulation Unit)                                            | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 7. Food or scarce resource harvest areas on property<br>(traditional fishing locations, agricultural/berry extraction areas, etc.)                                         | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 8. Indications of early Euro-Canadian settlement within 300 m of property<br>(monuments, cemeteries, structures, etc.)                                                     | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 9. Early historic transportation routes within 100 m of property<br>(historic road, trail, portage, rail corridor, etc.)                                                   | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| Property-specific Information                                                                                                                                              | Yes                                 | Unknown                             | No                                  |
| 10. Property is designated and/or listed under the <i>Ontario Heritage Act</i><br>(municipal register and lands described in Reg. 875 of the <i>Ontario Heritage Act</i> ) | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| 11. Local knowledge of archaeological potential of property<br>(from aboriginal communities, heritage organisations, municipal heritage committees, etc.)                  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| 12. Recent deep ground disturbance <sup>†</sup><br>(post-1960, widespread and deep land alterations)                                                                       | <input type="checkbox"/>            | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

<sup>†</sup> Archaeological potential can be determined not to be present for either the entire property or a part(s) of it when the area under consideration has been subject to widespread and deep land alterations that have severely damaged the integrity of any archaeological resources. Deep disturbance may include quarrying or major underground infrastructure development. Activities such as agricultural cultivation, gardening, minor grading and landscaping are not necessarily considered deep disturbance. Alterations can be considered to be extensive or widespread when they have affected a large area, usually defined as the majority of a property.

“Archaeological potential” is a term used to describe the likelihood that a property contains archaeological resources. This checklist is intended to assist non-specialists screening for the archaeological potential of a property where site alteration is proposed.

Note: for projects seeking a Renewable Energy Approval under Ontario Regulation 359/09, the Ministry of Tourism and Culture has developed a separate checklist to address the requirements of that regulation.
