1. Introduction

Beacon Environmental Limited (Beacon) has been retained by Sixteenth Land Holdings Inc. to prepare an Arborist Report and Tree Inventory and Preservation Plan in support of the Master Environmental and Servicing Plan (MESP) and Official Plan Amendment application to permit the development of a residential community at 4134 Sixteen Avenue in the City of Markham.

The property size is a total of 168.64 hectares (416.72 acres), and is located on the north side of 16th Avenue, on the west side of Kennedy Road. It has a small length of frontage on the east side of Warden Avenue in the City of Markham Region of York. The site is currently comprised of an active golf course which opened in the 1970's and has been heavily planted with trees.

Trees on private property are protected under The City of Markham's Tree Preservation Bylaw, which states that no person shall injure or destroy a tree diameter greater than 20 cm without first obtaining a permit. The City of Markham's Trees for Tomorrow Streetscape Manual requires that an appraisal value be determined for trees greater than 40 cm in accordance with the Council of Tree and Landscape Appraisers Guide for Plant Appraisal. Due to the high number of trees present on the property, the City directed that the Arborist Report could be scoped down to provide the following:

1. Groupings of similar species
2. Endangered Species
3. Heritage species – individually significant species 40 cm caliper and greater
4. Groupings that will potentially fall within the vegetation protection zone of the greenway

The purpose of this report is to provide an inventory and assessment of the trees on or adjacent to the subject property to identify those trees that are recommended for removal to accommodate the proposed development and to provide recommendations for tree preservation measures and mitigation as required by the City of Markham.

2. Methods

Trees were tagged with individually numbered aluminum forestry tags between April and September 2016 and located by topographical survey. A visual assessment of the trees was undertaken from April 2016 to September 2016 and all trees ≥ 40 cm in diameter at breast height (DBH, measured 1.4 m above grade) on the property were inventoried and assessed according to accepted arboricultural guidelines. Trees were measured at DBH and condition was assessed based on presence and severity of flaws, damage, evidence of pests or diseases, structural condition, dead or dying branches, or other decline indicators. Trees 20-39 cm DBH were inventoried in groups noting species present and the overall health of trees in the group.

Additionally, trees within approximately 6 m of the property line were inventoried and assessed. As these trees are located on private property, it was not possible to complete a full assessment. It should be noted that the majority of trees are located in residential rear yards. The trees were assessed to the extent possible from the road allowance and subject property and tree size and condition were estimated.

This report was prepared using the accepted arboricultural guidelines and standards for tree protection and reporting.

3. Results

A total of 4,260 trees were inventoried and assessed within the subject property. Figures detailing the tree locations are provided in **Appendix A, Tree Inventory and Preservation Plan**. Detailed tree inventory and evaluation data are provided in **Appendix B**. Inventory information in the table includes: tree/tag numbers, tree species, size, health condition, retention value, minimum required tree protection zone (TPZ), and recommendations.

Due to the high number of trees on the site, some trees have duplicate tag numbers. Trees with duplicate tag numbers are denoted with the suffix “-B”.

A total of 31 tagged trees that were dead or in poor condition were removed by the golf course in 2016. Most were Ash trees that were in an advanced state of decline or dead due to the Emerald Ash Borer. Trees No. 606-615, 679, 681, 863-870, 872, 882, 975, 1403, 1410, 1961, 1962, 2872, 2874, 2917, and 2938 were removed.

Trees measuring 40 cm DBH or greater accounted for approximately 41% of the trees present on property, for a total of 1,735 trees greater than 40 cm DBH. Of the trees greater than 40 cm DBH, the dominant tree cover was coniferous, accounting for 56% of the trees inventoried. Non-native species accounted for 52% of the trees inventoried, with Austrian Pine (*Pinus nigra*), Norway Spruce (*Picea abies*), Silver Maple/Freeman’s Maple (*Acer saccharinum*/*Acer x freemanii*), Colorado Blue Spruce (*Picea pungens*), White Spruce (*Picea glauca*), and Norway Maple (*Acer platanoides*) as the dominant species present on the site. **Table 1** summarizes the dominant species composition for trees ≥ 40 cm DBH.

Table 1. Dominant Species of Trees ≥ 40 cm DBH

Species	Percentage of Trees
Austrian Pine	18%
Norway Spruce	11%
Silver Maple	9%
Colorado Blue Spruce	9%
White Spruce	8%
Norway Maple	7%
Freeman Maple	5%
White Pine	5%

All trees ≥ 40 cm DBH were assessed and a health condition rating was determined. The majority of trees (54%) are in good condition. **Table 2** summarizes the condition of trees ≥ 40 cm DBH. Tree condition ratings are as follows:

- Poor– Severe dieback, significant lean, decayed, missing leader, significant disease presence

- Fair – Moderate dieback and/or lean, limb defects, multiple stems, moderate foliage damage from stress
- Good – Healthy vigorous growth, no or minor visible defects or damage

Table 2. Health Condition Ratings of Trees ≥40cm DBH

Condition	Percentage of Trees
Dead	1%
Poor	4%
Fair-Poor	3%
Fair	16%
Good-Fair	22%
Good	54%

3.1 Threatened and Endangered Species

Butternut

Twenty-three Endangered Butternut trees (*Juglans cinerea*) were recorded during surveys on the property. Some of these will not be affected by the development and others are non-retainable (i.e. trees are affected by butternut canker to such an advanced degree that retaining the tree would not support the protection or recovery of the species). Non-retainable trees are not protected under the *Endangered Species Act* (ESA). The remaining trees that will be affected, can be either directly removed or harmed under the ESA as long as the appropriate Registry (Section 23.7 of O. Reg. 242/08) or ESA permit process is followed. Butternut Health Assessments were completed by a Certified Butternut Assessor from Beacon and impacts to Butternut will be dealt with in accordance with the ESA and in consultation with the Ministry of Natural Resources and Forestry. For further information concerning the Butternut trees on the property, refer to the Natural Environment Report/Environmental Impact Study (Beacon, 2016).

Kentucky Coffee-Tree

Several planted Kentucky Coffee-trees were identified on the golf course. The species is designated as Threatened in Ontario, but is not native to York Region. Extant populations of Kentucky Coffee-tree are limited to extreme southwestern Ontario (Counties of Lambton, Kent, and Essex) (Environment Canada 2014); however, Kentucky Coffee-tree is frequently planted as an ornamental tree (often from questionable genetic stock) and, as a result, it is located well beyond the species known native range on Ontario (Environment Canada 2014).

4. Impact Assessment

The proposed development for the subject property includes a mix residential and commercial uses, as well as open space blocks, an elementary school block, parks, and SWM ponds.

A recommendation was made to preserve or remove trees based on a review of the proposed development plan and associated servicing and grading plans. Based on discussions with Stantec, grading may be restricted to within 4 m of the northern property line for **lots 149-152** and **lots 180-189**.

The limits of grading will be reviewed at detailed design to enhance tree preservation opportunities to the greatest extent possible.

4.1 Tree Removals

1. Trees located within the area of proposed development on the subject site that will be affected by the proposed new buildings, driveways, infrastructure and grading will require removal. There are currently 1,622 trees ≥ 40 cm DBH and 2,318 trees 20-39 cm DBH proposed for removal under these constraints.
2. A total of 27 trees are located within the regional right-of-way of Kennedy Road, seven of which are recommended for removal due to proximity to grading on the subject property. Trees No. 4060-4064, 4076, and 4100 are recommended for removal due to proposed entrances off Kennedy Road. The remaining trees are recommended for preservation.
3. A total of 25 trees are located within the regional right-of-way of Sixteenth Avenue, 11 of which are recommended for removal. Trees No. 496, 3705, 4048, 4049, 4521 to 4524, and 4532 to 4534 are recommended for removal due to proposed development and grading within the minimum tree protection zone. The remaining trees are recommended for preservation and are to be protected with tree protection fencing in accordance with the Region of York standards; however, these trees will likely require removal for planned widening of Sixteen Avenue.
4. One large Sugar Maple, tree #1615-B (**Figure 4**), located immediately adjacent to the east property line will be impacted by construction of a retaining wall in that location. As a result, this tree is recommended for removal. *Permission must be obtained by the adjacent landowner prior to harming or removing this tree.*
5. Of the trees ≥ 40 cm DBH recommended for removal, 128 trees were found to be in a state of decline and have a limited longevity, 41 of which are Ash trees.
6. A total of 56 Ash trees ≥ 40 cm DBH are located on the subject property, eight of which are in good condition. There is evidence that Emerald Ash Borer is prevalent on the subject property and those trees in good condition are likely infected with Emerald Ash Borer and have a limited longevity.

7. Compensation for tree removal can be provided through replacement plantings on-site. Requirements for tree replacement should be determined in consultation with the City.
8. Approval from the City of Markham is required prior to any tree removal.

4.2 Protection and Preservation Guidelines

A total 320 trees have been identified for preservation, primarily within open space blocks and along rear lot lines where grading can be minimized or avoided. Trees adjacent to the subject property on private properties are to be protected as per the City of Markham's requirements and details for tree protection. *Where impacts to neighbouring trees cannot be avoided then permission from the neighbouring landowner(s) must be obtained prior to harming or removing trees.*

Trees are living organisms that react to changes in their environment. Trees can be damaged during construction without showing signs of damage until some years later. Damage to the roots is typically an injury resulting from construction, and often results in slow death of the tree through its inability to absorb sufficient water and nutrients.

The main cause of construction damage to trees is from compaction of the soil around the roots. Equipment movement over the roots compresses the air pockets in the soil which reduces the tree's ability to absorb nutrients and water and harms the tree's health. Equipment use within the root preservation zones should be restricted to ensure that the tree's roots are not disturbed.

Equipment can also physically damage the trees through striking the trunk, limbs and/or roots. Felled trees can also cause damage other trees during tree removals. The use of proper equipment and best management practices will minimize the damage. The contractor should be held responsible for all avoidable damage to the trees during all stages of development.

Tree preservation is dependent not only on protecting the root zone from compaction and damage, but it is also critical to ensure that the structural roots within the root plate are not disturbed. Impacts to this area may result in a failure of the trees.

During construction, there are situations where work must be completed within a protection zone that will have an impact to the root of the preservation trees. The most common root injury is cutting typically caused by trenching for utilities. The feeder roots of a tree are typically situated within the upper 30 cm of the soil profile. Any trenching or excavation within this zone will damage roots. Roots play a critical role in anchoring a tree. If major support roots are severed the tree is more susceptible to wind throw damage and could pose a hazard to adjacent structures and people.

Tree roots require space and air to absorb water and minerals. When grades are increased the feeder roots are no longer able to effectively function. Grade changes of only ten centimeters can kill the fine roots of some trees.

Tree Preservation Measures

The following recommendations are intended to protect trees that have been identified for preservation during the development process.

1. Trees identified for retention shall be protected through the establishment of a tree protection zone (TPZ). The TPZ is generally established at the dripline of the tree crown, or at a minimum distance measured from the edge of tree trunk as specified in the **Table 3**.

Table 3. Minimum Tree Protection Zones

Trunk Diameter (DBH)	Minimum Protection Distances ¹
< 10 cm	1.2 m
10 – 29 cm	1.8 m
30 – 40 cm	2.4 m
41 – 50 cm	3.0 m
51 – 60 cm	3.6 m
61 – 70 cm	4.2 m
71 – 80 cm	4.8 m
81 – 90 cm	5.4 m
91-100 cm	6 m
> 100 cm	6 cm protection for each 1 cm diameter

¹ to be measured from the outside edge of the base of the tree

2. The TPZ shall be demarcated with tree protection hoarding consisting of 1.2 m plastic orange snow fencing on 2x4 wood frame, or equivalent as approved by the City of Markham.
3. Tree Protection Fencing shall be installed and in good condition prior to the start of construction and is to be maintained in good condition throughout the duration of construction activities.
4. The TPZ shall remain undisturbed for the duration of the construction period. Areas within the tree protection fencing are not to be used for any type of storage.
5. Trees shall not have any rigging cables or hardware of any sort attached or wrapped around them, nor shall any contaminants be dumped within the protective areas or flushed where they may come into contact with the feeder roots of the trees.
6. In the event that it is necessary to remove additional limbs or portions of trees, after construction has commenced, to accommodate construction, the Consulting Arborist or project administrator is to be informed and the removal is to be executed carefully and in full accordance with arboricultural techniques, by a qualified arborist.
7. During excavation operations in which roots are affected, the Contractor is to prune all exposed roots cleanly. Pruned root ends shall point obliquely downwards. The exposed roots should not be allowed to dry out. The Contractor shall discuss watering of the roots with the Owner and Contract Administrator prior to pruning to ensure that so that optimum soil moisture is maintained during construction and backfilling operations. Backfilling must be completed as soon as practical with clean, uncontaminated native topsoil or mulch.

8. Trees to be retained could be negatively affected by construction and become potentially hazardous if their health and/or structure are compromised; therefore, trees should be reassessed post-construction.

5. Conclusion

This report provides an inventory and assessment of the trees on and adjacent to 4134 Sixteen Avenue in the City of Markham. A residential subdivision is proposed for the subject property. Based on a review of the draft plan of subdivision and associated grading and servicing plans, a recommendation was made to preserve or remove trees.

A total of 4,260 trees were inventoried and assessed within and adjacent to the subject property. Due to the intensification of the proposed land use, it will be necessary to remove the majority of trees on the subject property. There are currently 1,622 trees ≥ 40 cm DBH and 2,318 trees 20-39 cm DBH proposed for removal. Opportunities for tree preservation were identified within open space blocks and along the property lines where grading can be minimized. Recommendations concerning tree protection and removal will be further reviewed and evaluated at detailed design.

The assessment of the trees presented within this report has been prepared using accepted arboricultural techniques. These include a visual examination of the above-ground parts of each tree. The trees examined were not dissected, cored, probed, or climbed, and detailed root crown examinations involving excavation were not undertaken.

As trees are living organisms and their health is constantly changing, no guarantees are offered or implied, that these trees or any part of them will remain standing. A standing tree will always pose some risk, and a tree's behaviour cannot be predicted in all situations.

The assessment presented in this report is valid at the time of inspection and it is recommended that the trees are re-assessed on a regular basis.

960-B	<i>Pinus nigra</i>	Austrian Pine	41,40	Good		Remove	-
961-B	<i>Pinus nigra</i>	Austrian Pine	40	Good		Remove	-
977-B	<i>Picea abies</i>	White Spruce	41	Good		Remove	-
978-B	<i>Picea abies</i>	White Spruce	43	Good		Remove	-
979-B	<i>Picea abies</i>	White Spruce	50	Good		Remove	-
980-B	<i>Picea abies</i>	White Spruce	52	Good		Remove	-
983-B	<i>Pinus strobus</i>	White Pine	57	Good		Remove	-
986-B	<i>Quercus rubra</i>	Red Oak	50	Good		Remove	-
1123-B	<i>Pinus nigra</i>	Austrian Pine	44	Fair		Remove	-
1456-B	<i>Pinus nigra</i>	Austrian Pine	45	Fair		Remove	-
1532-B	<i>Fraxinus pennsylvanica</i>	Green Ash	53	Poor		Remove	-
1586-B	<i>Fraxinus pennsylvanica</i>	Green Ash	47	Good		Remove	-
1615-B	<i>Acer saccharum</i>	Sugar Maple	50	Good	Off-site	Remove	-
1832-B	<i>Acer platanoides</i>	Norway Maple	43	Good		Remove	-
1841-B	<i>Acer platanoides</i>	Norway Maple	48	Good		Remove	-
2556-B	<i>Fraxinus americana</i>	White Ash	91	Fair-poor	potentially infested with Emerald Ash Borer	Remove	-
3718-B	<i>Pinus nigra</i>	Pinus nigra	40,50	Good		Remove	-

Table B-3. Inventory of Trees 20 – 39 cm DBH on Subject Property

Tag No.	Botanical Name	Common Name	DBH (cm)	Condition	Comments	Recommendation	TPZ radius (m)
1	<i>Picea pungens</i>	Colorado Blue Spruce	18	Good		Remove	-
2	<i>Pinus nigra</i>	Austrian Pine	28	Good		Remove	-
3	<i>Pinus sylvestris</i>	Scotch Pine	18	Fair	codominant leaders, one leader dead	Remove	-
4	<i>Pinus nigra</i>	Austrian Pine	28	Good		Remove	-
5	<i>Picea glauca</i>	White Spruce	30	Good		Remove	-
6	<i>Picea glauca</i>	White Spruce	25	Good		Remove	-
7	<i>Picea glauca</i>	White Spruce	25	Good		Remove	-
8	<i>Picea glauca</i>	White Spruce	18	Good		Remove	-
9	<i>Picea glauca</i>	White Spruce	17	Good		Remove	-
10	<i>Picea glauca</i>	White Spruce	21	Good		Remove	-
12	<i>Picea glauca</i>	White Spruce	20	Good		Remove	-
13	<i>Picea glauca</i>	White Spruce	28	Good		Remove	-
14	<i>Picea glauca</i>	White Spruce	22	Good		Remove	-
15	<i>Picea glauca</i>	White Spruce	26	Good		Remove	-
16	<i>Picea glauca</i>	White Spruce	21	Good		Remove	-
17	<i>Picea glauca</i>	White Spruce	20	Good		Remove	-
20	<i>Pinus strobus</i>	White Pine	22	Good	needles slightly yellow	Remove	-
21	<i>Pinus strobus</i>	White Pine	24	Good	needles slightly yellow	Remove	-
22	<i>Pinus strobus</i>	White Pine	21	Good	needles slightly yellow	Remove	-
23	<i>Pinus strobus</i>	White Pine	22	Good	needles slightly yellow	Remove	-
24	<i>Pinus strobus</i>	White Pine	20	Good	needles slightly yellow	Remove	-
25	<i>Pinus strobus</i>	White Pine	18	Good	needles slightly yellow	Remove	-
26	<i>Pinus strobus</i>	White Pine	17	Good	needles slightly yellow	Remove	-
32	<i>Quercus macrocarpa</i>	Bur Oak	15,12	Fair	embedded fence, grading on adjacent property	Remove	-
34	<i>Quercus macrocarpa</i>	Bur Oak	14,13	Fair		Remove	-
35	<i>Quercus macrocarpa</i>	Bur Oak	15,11	Good		Remove	-
37	<i>Quercus macrocarpa</i>	Bur Oak	13,15	Good		Remove	-
40	<i>Quercus macrocarpa</i>	Bur Oak	21	Fair	uneven crown due to crowding with 39	Remove	-
42	<i>Quercus macrocarpa</i>	Bur Oak	34	Fair	uneven crown due to crowding	Remove	-
43	<i>Quercus macrocarpa</i>	Bur Oak	20,12	Fair	uneven crown due to crowding	Remove	-
46	<i>Tilia americana</i>	Basswood	14,14,14,14	Poor	open wound near base of two trunks, one trunk with 3 open wounds, crowded, poor form	Remove	-
52	<i>Tilia americana</i>	Basswood	34	Good		Remove	-
54	<i>Fraxinus americana</i>	White Ash	37	Good	embedded fence	Remove	-
55	<i>Fraxinus americana</i>	White Ash	32	Good		Remove	-
56	<i>Tilia americana</i>	Basswood	30	Fair	codominant leaders with included bark	Remove	-
59	<i>Fraxinus americana</i>	White Ash	33	Fair		Remove	-
60	<i>Fraxinus americana</i>	White Ash	38	Fair		Remove	-

Tag No.	Botanical Name	Common Name	DBH (cm)	Condition	Comments	Recommendation	TPZ radius (m)
61	<i>Acer platanoides</i>	Norway Maple	20	Poor	cavity in trunk, uneven crown, open wound at branch stub	Remove	-
66	<i>Prunus sp.</i>	Cherry species	22,14	Poor	one leader cut off, uneven, crowded	Remove	-
67	<i>Tilia americana</i>	Basswood	34	Fair	crooked trunk, crowded	Preserve	2.4
74	<i>Picea glauca</i>	White Spruce	18	Good		Remove	-
75	<i>Fraxinus pennsylvanica</i>	Green Ash	24	Poor		Remove	-
76	<i>Fraxinus pennsylvanica</i>	Green Ash	25	Poor		Remove	-
77	<i>Picea glauca</i>	White Spruce	23	Good		Remove	-
78	<i>Picea glauca</i>	White Spruce	34	Good		Remove	-
79	<i>Picea glauca</i>	White Spruce	38	Good		Remove	-
80	<i>Picea glauca</i>	White Spruce	30	Good		Remove	-
81	<i>Picea glauca</i>	White Spruce	25	Good		Remove	-
82	<i>Picea glauca</i>	White Spruce	27	Good		Remove	-
83	<i>Picea glauca</i>	White Spruce	30	Good		Remove	-
84	<i>Picea glauca</i>	White Spruce	20	Good		Remove	-
85	<i>Picea glauca</i>	White Spruce	30	Good		Remove	-

Table B-4. Inventory of Trees 20 – 39 cm DBH on Subject Property with Duplicate Tag Numbers

Tag No.	Botanical Name	Common Name	DBH (cm)	Condition	Comments	Recommendation	TPZ radius (m)
108-B	<i>Picea glauca</i>	White Spruce	20	Good		Remove	-
110-B	<i>Picea glauca</i>	White Spruce	25	Good		Remove	-
126-B, 127-B	<i>Tilia americana</i>	Basswood	34-36	Fair		Preserve	2.4
419-B	<i>Picea abies</i>	Norway Spruce	36	Fair	uneven due to crowding	Remove	-
420-B	<i>Picea abies</i>	Norway Spruce	31	Fair	uneven due to crowding	Remove	-
424-B	<i>Picea abies</i>	Norway Spruce	27	Fair	uneven due to crowding	Preserve	2.4
426-B	<i>Picea abies</i>	Norway Spruce	30	Fair-Poor	codominant leaders, poor form	Preseve	2.4
427-B	<i>Acer negundo</i>	Manitoba Maple	28	Fair		Remove	-
430-B	<i>Pinus sylvestris</i>	Scotch Pine	28	Fair		Remove	-
476-B, 477-B 478-B, 479-B, 2859-2862	<i>Pinus sylvestris</i> , <i>Malus sp.</i>	Scotch Pine, Crabapple	22-35	Good - Poor		Remove	-
496-B	<i>Acer platanoides</i>	Norway Maple	35	Excellent		Preserve	2.4
707-B	<i>Acer platanoides</i>	Norway Maple	30	Fair		Remove	-
707-C	<i>Acer platanoides</i>	Norway Maple	30	Fair		Remove	-
819-B	<i>Pinus strobus</i>	White Pine	39	Good		Remove	-
875-B, 876-B, 877-B, 878 -B	<i>Picea glauca</i>	White Spruce	23-34	Good		Remove	-
880-B	<i>Ostrya virginiana</i>	Eastern Hop-hornbeam	25	Good		Remove	-
881-B, 886-B	<i>Thuja occidentalis</i>	White Cedar	25	Good		Remove	-
887-B	<i>Acer saccharum</i>	Sugar Maple	26	Good		Remove	-
891-B	<i>Juglans nigra</i>	Black Walnut	27	Good		Remove	-
895-B, 901-B, 902-B, 903-B, 915-B	<i>Tsuga canadensis</i>	Eastern Hemlock	24-39	Good		Remove	-
899-B, 900-B, 904-B, 923-B, 926-B, 927-B, 929-B, 930-B, 940-B	<i>Acer saccharum</i>	Sugar Maple	22-39	Good		Remove	-
919-B, 921-B	<i>Quercus macrocarpa</i>	Bur Oak	22, 25	Good		Remove	-
931-B	<i>Tilia americana</i>	Basswood	34	Good		Remove	-
912-B, 914-B, 932-B, 936-B, 941-B, 942-B	<i>Thuja occidentalis</i>	White Cedar	28, 37	Good		Remove	-
944-B, 945-B, 947-B, 948-B	<i>Picea glauca</i>	White Spruce	29-31	Good		Remove	-
950-B, 951-B, 958-B, 959-B, 962-B to 976-B	<i>Pinus nigra</i> , <i>Pinus strobus</i>	Austrian Pine, White Pine	20-39	Good - Poor		Remove	-
981-B	<i>Picea abies</i>	Norway Spruce	28, 20	Good		Remove	-
984-B	<i>Pinus sylvestris</i>	Scotch Pine	31	Fair		Remove	-
985-B	<i>Pinus sylvestris</i>	Scotch Pine	25	Fair		Remove	-
1545-B	<i>Pinus strobus</i>	White Pine	30	Good		Remove	-
Tree Groups with No Tag Numbers							
Group A	<i>Pinus sylvestris</i> , <i>Pinus banksiana</i>	Scotch Pine, Jack Pine	20-36	Fair		Remove	2.4
Group C	<i>Picea glauca</i> , <i>Pinus strobus</i>	White Spruce, White Pine	25-30	Fair-Good		Remove	2.4
Group D	<i>Malus sp.</i>	Apple species	25-30	Fair-Good		Remove	2.4
Group E	<i>Picea glauca</i> , <i>Picea abies</i>	White Spruce, Norway Spruce	20-30	Good		Remove	2.4

Table B-5. Inventory of Trees within 6 m on Adjacent Property

Location	Botanical Name	Common Name	Condition	Comments
South of Tree No. 1588	<i>Juglans nigra</i>	Black Walnut	Good	3 trees 15-25 cm, 1 tree ~50 cm within 1 m of fencing
	<i>Picea pungens</i>	Colorado Blue Spruce	Fair	~20cm tree within 1m of fencing
West of Tree No. 1615	<i>Thuja occidentalis</i>	White Cedar	Good	2 trees ~30 cm within 1m of fencing
	<i>Acer saccharum</i>	Sugar Maple	Good	1 tree ~50 cm within 1m of fencing
East of Tree No. 1615	<i>Thuja occidentalis</i>	White Cedar	Good	Mature hedge
Northwest Corner	<i>Pinus sylvestris</i>	Scotch Pine	Fair	6 trees >30 cm DBH
	<i>Picea pungens</i>	Colorado Blue Spruce	Good	2 trees >30 cm DBH
	<i>Tilia cordata</i>	Little Leaf Linden	Good	2 trees >30 cm DBH
